Designing software is hard. It has never been easier to create usable software than it is today with the new web based prototyping platform, Corona, which lets you quickly create prototypes using web browser technology. With Corona's web based prototype design, it doesn't matter what platform or device you have, or what size your screen is, prototypes can be designed and shared across all major devices, including PCs, tablets and smartphones. Corona is a simple to use, easy to understand and powerful web design tool. You can create custom designs without any programming skills by using the drag-and-drop based drag-and-drop interface. You can even create functional prototypes by incorporating prototype components such as navigation, splash screens and buttons. Corona's design tool is also incredibly powerful, allowing users to quickly create highly functional prototypes. Users can create prototypes by importing images, video, music and web pages, and create custom HTML and CSS prototypes from these elements. Users can also use the web platform to design custom user interfaces and complete mobile applications.

- Animate Your Prototypes - Quickly And Easily Create Usable Prototypes - Import Webpages, Images, Videos, And More - Create Custom HTML And CSS Prototypes - Create Custom Forms, Tables And Navigation - Animate Objects And Prototype Animations - Design Flexible Interfaces For Tablets, Phones And And More - With The Option To Integrate Easy Sign Up Forms - Develop Projects Online Using The WYSIWYG Approach - 10+ Themes Available, Including A Hybrid Theme - Use Folding Components To Create Easy And Interactive Prototypes - Create Custom Audio And Video Pages - Support For Amazon S3 And Google Apps Hosting - Use The Server Side And Client Side Loaders To Optimize For Performance Corona is an all-new, fully open source web application development platform based on jQuery, Bootstrap, and Ruby on Rails. It also includes an intuitive drag and drop interface, robust library of building blocks, and a fantastic suite of tools for creating web applications. It is the ideal solution for creating web applications in a dynamic, intuitive and easy to use manner. Corona is not just another programming language, but a whole development platform. - Cut coding time in half - Web Based Tooling - Designed With End Users In Mind - Gives You An In-
